SUMMARY

Experienced Frontend Developer with a demonstrated history of working in the tech industry (8+ years of experience working in IT as a product/project manager closely with engineering and design teams). A software engineer with the ability to challenge others and myself to develop solutions to problems and situations with a growth/learning mindset and cultural awareness powered by international experience. Versed in React, Javascript, HTML, CSS, Git, Github, Axios, and Agile methodology, but committed to consistently learning new skills to further my repertoire.

- Frontend Development
- UX/UI Design
- Agile and Scrum Methodologies
- QA Fundamentals

EXPERIENCE

FREELANCE, Austin, Texas   **01/2022 – Present**
Jr. Software Engineer
Created 3 personal projects focused on real-world applications of data science principles and best practices; built skills in HTML, CSS, Javascript, GitHub, and SQL. Developed a portfolio of individually and collaboratively focused in-class projects, including:

- Personal website: Portfolio landing page built with React, Javascript, and CSS
  https://thriving-pithivier-7776c4.netlify.app/
- Weather App: My very first website was created to display objects from an API. This project includes skills in React, and JavaScript with basic HTML & CSS https://wizardly-stonebraker-ac8f03.netlify.app/
- Dictionary App: Second project built with React and open-source API
  https://wondrous-salamander-e40509.netlify.app/
